

# UEBLER FEEDING MACHINES

## Model 810 • 30 Bushels

### Silage / Haylage

Ueblor has been manufacturing feeding machines for over 30 years. From our extensive experience we know exactly what you want in a feeding machine.

Ueblor silage carts feature a forage box unloading design which provides even-feeding of materials into the jumbo 12" auger discharge. Easily unloads all types of feed including the toughest silage. Ueblor silage carts come in two sizes. Model 810 holds 30 bushels and Model 812 holds 43 bushels. Both riding models feature easy turning automotive-type steering and a comfortable, adjustable chair. A convenient foot pedal or hand control engages the feed mechanism and an easy-acting hand control operates the hydrostatic transmission.

Exclusive center pivot makes Ueblor the most maneuverable riders available today. And Ueblor's simple design and durable materials are backed up with a one year warranty.

## Model 812 • 43 Bushels

### Forage Box Unloading Design

No need for costly variable speed unloading mechanism. Spiral beater prevents bridging - provides even feeding of materials into the auger discharge. Easily unloads all types of feed including the toughest haylage.

### Maneuverable

Center pivot is designed into each Ueblor machine by positioning the pivot wheels as close to the center of the machine as possible. This minimizes the turning radius giving Ueblor the best possible combination of maneuverability and carrying capacity available anywhere.
